# Discover the Marina Palamós

Marina Palamós is a leading marina, located in the heart of the Costa Brava in an exceptional natural setting, ideal for experiencing nautical activities and discovering the region.

We offer 904 berths ranging from 7 to 30 meters in length, adapted to the needs of all types of vessels. Our facilities are modern and easily accessible, offering ample parking spaces, and we provide surveillance services to ensure a safe and comfortable experience.

At the marina, you can enjoy a wide range of nautical services and activities, as well as a diverse culinary selection. Furthermore, we are located just a few minutes away from the historic center of Palamós, allowing you to experience the local tradition, history, and culture.

## Opening Hours

The marina is open 24 hours a day, 7 days a week.  
During the night, we have night-duty staff and security personnel on site.

## Customer Assistance Hours

June 15—August 31

Monday to Sunday  
08.00–21.00 h

September 1—June 14

Monday to Friday  
09.00–18.00 h

Saturday and Sunday  
10.00–14.00 h

# Services

## Harbormaster's Office

Our professional and dedicated team will always be available to assist you with any needs you may have. Their goal is to provide you with a friendly and efficient service, ensuring that your experience is comfortable, pleasant, and unforgettable.

-  Berth Reservations & Management.
-  Tourist Information.
-  Points of Interest.
-  Power Adapters.

## Facilities

-  Water and power supply pedestals.
-  Wi-Fi (Network name: Port-Marina).
-  Public restrooms and controlled access showers.
-  First aid kit and defibrillator.
-  General video surveillance.
-  Parking with 20 electric vehicle charging spots.
-  Bilge water vacuum.
-  Fuel station.
-  Technical area.
-  45-ton Travel-lift and two forklifts.
-  Dry dock area.
-  Waste collection.
-  Nautical base.

We have a highly qualified team of sailors to assist you and provide technical advice whenever you need it.

## Marina Staff

We have a highly qualified docking crew, ready to assist you with mooring and unmooring maneuvers, as well as providing technical advice in any situation that requires it.

- Mooring Assistance.
- RIB service.
- Bilge pumping.
- Rope and mooring line preparation.

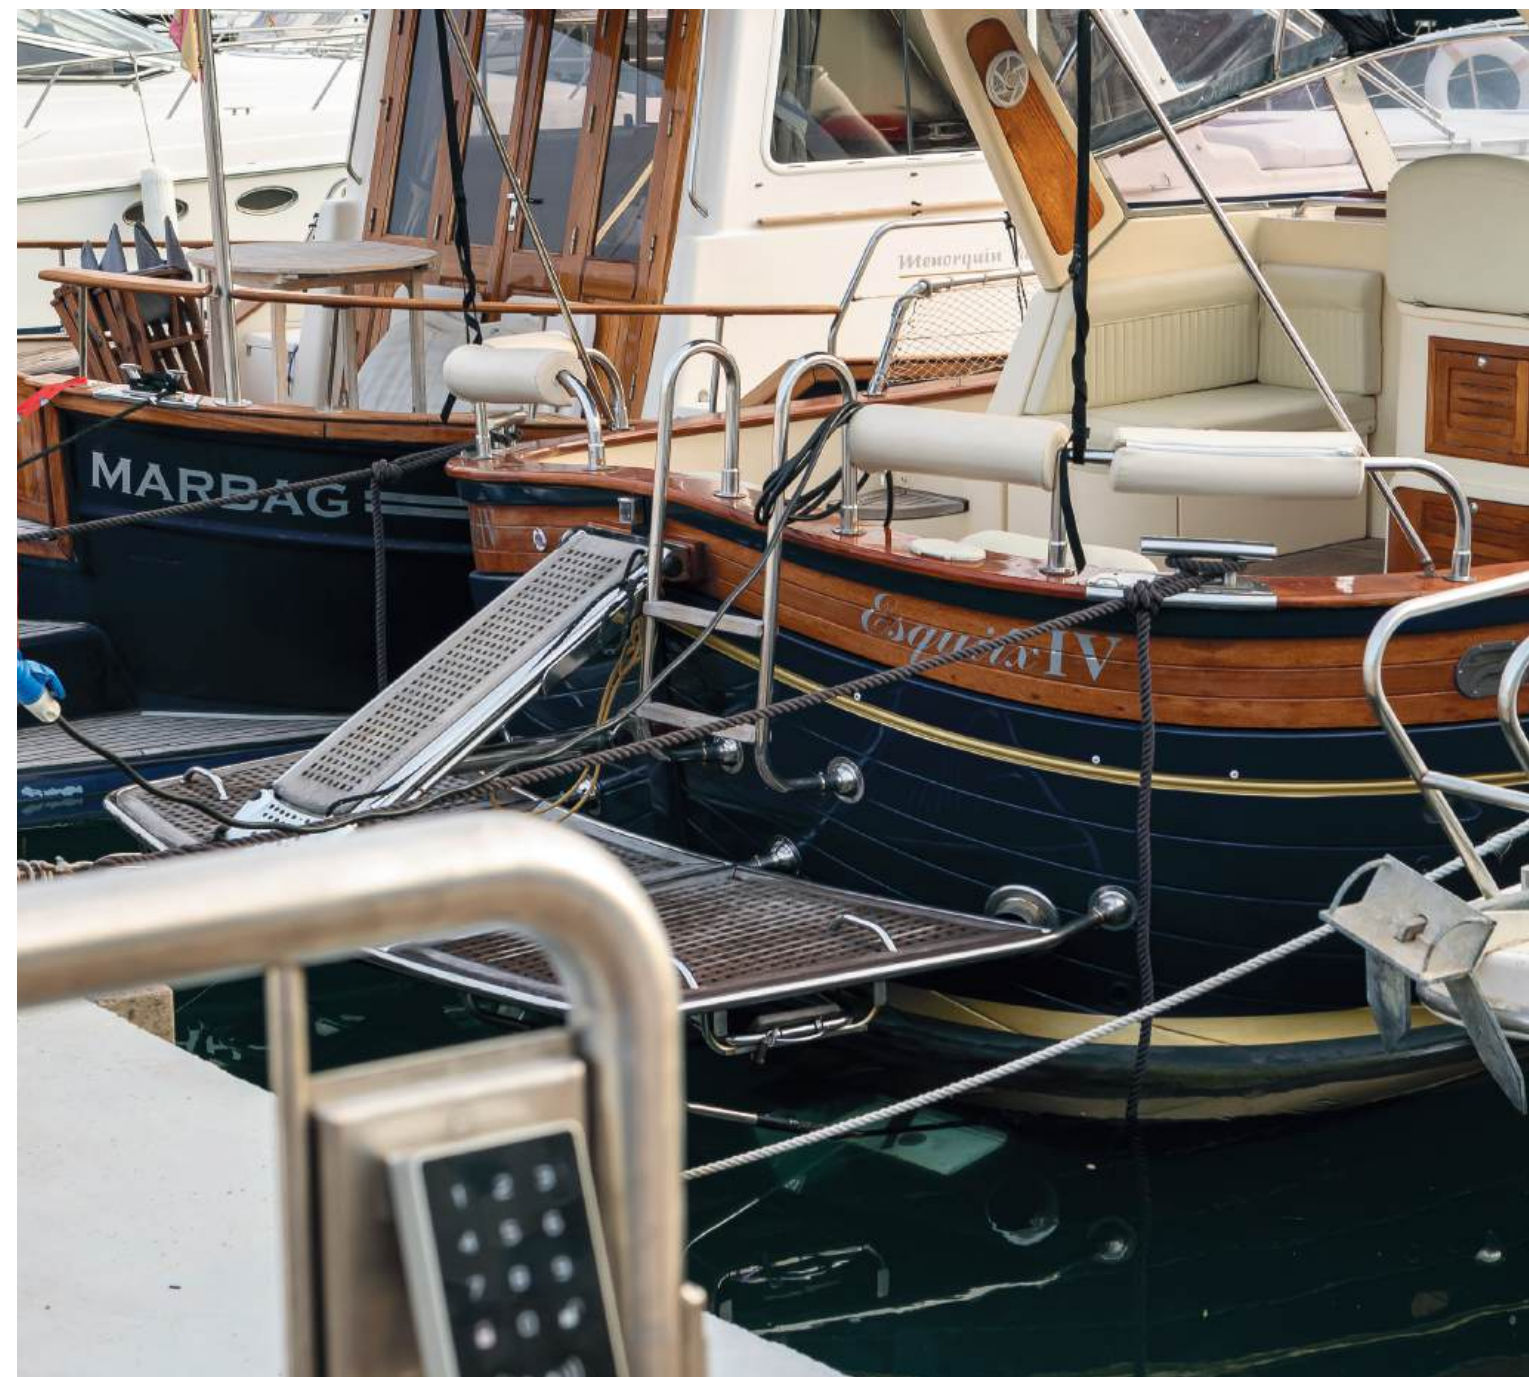

# Enjoy your stay at Marina Palamós

Marina Palamós is not just a marina it's a destination where sailing, leisure, and nature come together.

Having a safe and available mooring ensures peace of mind and comfort to enjoy sailing along the Costa Brava. At Marina Palamós, your vessel will be protected in a modern and well-equipped environment, with state-of-the-art facilities and a professional team always ready to make your stay as enjoyable as possible, while respecting and celebrating the beauty of the Mediterranean.

In addition, you will find various activities to enhance your stay: water activities such as diving and snorkeling to explore the sea, or kayaking and paddleboarding to calmly tour the coast. You can also enjoy bike routes, the authentic Mediterranean cuisine, and specialized services for a complete experience. That's not all: take a walk along the Camí de Ronda enjoying the sea breeze or approach the old town of Palamós using our panoramic elevator, which will make your experience unforgettable.

Marina Palamós is not just a marina; it is a destination where nautical activities, leisure, and nature intertwine to create an unforgettable experience. Here, every moment is an invitation to experience the Costa Brava with intensity and emotion.

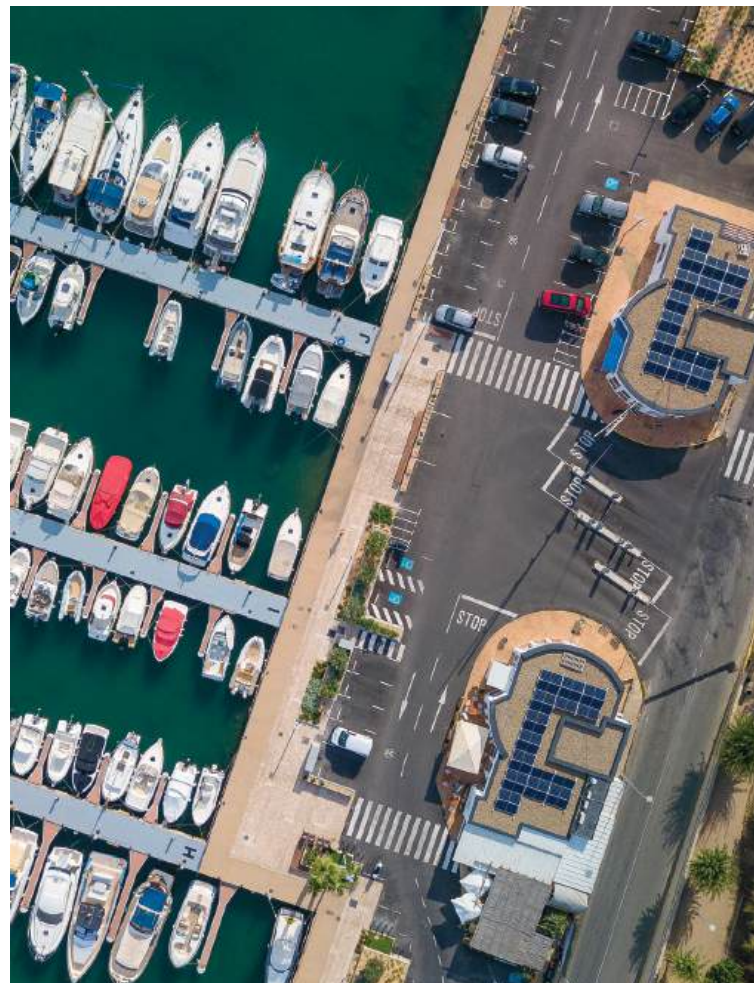

# Sustainability

## A path towards sustainability

In a world where the balance between progress and environmental care is increasingly crucial, our story begins with a firm commitment: sustainability as the core of our management to achieve direct emissions neutrality.

## 01

### Energy Self-Sufficiency: Energy from the Sun and Sea

A place where renewable energy is generated, stored, and consumed in a clean and efficient manner. Our photovoltaic solar system, accompanied by an energy storage system, makes this possible. With this system, we achieve 70% energy independence and reduce our carbon footprint. But this is not all: the sea is also our ally with the installation of a desalination plant that allows us to sustainably utilize water resources.

## 02

### Biodiversity: A home for nature

In our commitment to the marine environment, we promote the regeneration of marine life through the implementation of biomimetic micro-reefs. These structures not only capture CO<sub>2</sub>, but also restore marine fauna and flora, generating biomass and returning vitality to our Mediterranean Sea.

You can view the activity of these micro-reefs in the following link: [Micro Reef Webcam](#).

On land, we have planted 4,000 new plants of 25 species adapted to the environment, creating a resilient and diverse ecosystem. Additionally, our photocatalytic pavements purify the air, improving environmental quality and making our space a healthier place for all.

### 03

#### Waste management: a future without waste

Proper waste management is a key piece in our sustainability puzzle. Distributed throughout the port, you have at your disposal an efficient management system that promotes the separation and recycling of both hazardous and non-hazardous materials. But we do not stop there: we also provide a bilge water extraction pump. Encouraging its use is essential!

#### A green legacy

This is our story, a tale of effort, innovation, and respect for the planet. Every action, from the generation of clean energy to the restoration of ecosystems, is a chapter in our journey towards sustainability. Because we believe that a sustainable world is not only possible, but necessary.

Achieving carbon neutrality is a contribution to the planet and future generations. Together, we are making it a reality.

# Help us preserve the Marina and its environment

01

**Make sustainable use of resources.** Water and energy, essential for practicing water sports, are limited natural resources, so we request their responsible use.

02

**Prioritize the use of biodegradable and eco-friendly** products in the cleaning and maintenance of boats.

03

**Prevent pollution and wastewater discharges into the sea** using the bilge water suction pump.

The legal regulations regarding the prevention of discharges from recreational vessels are outlined in Chapter V of Order FOM/1144/2003, dated April 28, and in Order FOM/1076/2006, dated March 29, which amends it.

04

**Sail with awareness.** Care for and preserve posidonia by anchoring responsibly.

05

**United Efforts.** Proper cleaning and care of the facilities, appropriate waste separation in the designated containers, and the use of the Blue Point (hazardous waste disposal point) at the dry dock for hazardous waste disposal are fundamental to maintaining a sustainable marina.

## DID YOU KNOW?

Each year, we generate, and store more than 400 MWh of energy and reduce emissions by 250 tons of CO<sub>2</sub> equivalent.
